

Berkay UZUN

Front-end Developer

While developing applications, I am an enthusiastic developer who is not limited to his related field and does not hesitate to enter different technologies and fields for needs.

WORK EXPERIENCE

Front-end Developer Extenship

03/2020 - 09/2022

Istanbul, Turkey

A company that produces applications that will facilitate the work of sellers on the Amazon e-commerce site.

Görevlerim

- I was responsible for adding new features and fixing bugs in the main application developed with VueJs.
- Construction and deployment of the website using NuxtJs. [Web Site](#)
- I developed a mobile application using React Native and successfully published it on the Google Play Store.
- I developed an application using VueJs and PHP that can store files on an AWS S3 Bucket in a private or public manner.
- I developed an application using VueJs, ExpressJs and MongoDB that our users can use as a survey and form.
- I developed a bot using NodeJs that sends a desired log message to the Discord application that we use as a communication channel.

SKILLS

JavaScript

VueJs / Vuex / Pinia

React / Redux

NuxtJs / NextJs

Typescript

NodeJs

ExpressJs / Fastify

HTML / Pug

CSS / SCSS

Figma

PHP / Slim Framework

Docker

PERSONAL PROJECTS

Translate App

- I developed an application that allows the translation of a selected word on the browser, and at the same time, it saves the meaning in a database.
- I developed a chrome extension using JavaScript to perform the operations. [GitHub](#)
- I developed a service (API) application using ExpressJs, Typescript and MongoDB for the extension to be able to perform the translation process. [GitHub](#)
- My next goal is to develop a web and mobile application where I can use the saved words.

Pagination Library for VueJs

- I have developed a simple npm library that pre-handles pagination for Vue2 and Vue3. [GitHub](#)
- My goal was to develop a plugin for VueJS and gain experience on it.
