## WORK EXPERIENCE

### Front-end Developer Extenship

03/2020 - 09/2022

Istanbul, Türkiye

A company in developing SaaS applications to streamline the operations of medium and large-scale sellers on Amazon's e-commerce platform.

Achievements/Tasks

- Led the frontend development process of a customizable SaaS application for Amazon sellers using VueJs.
- I developed the company's marketing website using Nuxt.js.
- Developed a mobile application using React Native for the SaaS platform and successfully published it on the Google Play Store.
- Developed a full-stack storage system running on AWS S3 bucket. Integrated authentication and authorization mechanisms to ensure secure access control for private files.
- Developed a Discord bot using Node.js for an alert system. Designed and implemented the bot's functionality to provide real-time alerts and notifications to Discord users.

## EDUCATION

### Computer Programming Manisa Celal Bayar University

09/2018 - 07/2020

## SKILLS

JavaScript

Typescript

VueJs / Vuex / Pinia

React / Redux / MobX

NuxtJs / NextJs

NodeJs

ExpressJs / Fastify

HTML / Pug

CSS / SCSS

Figma

PHP / Slim Framework

Docker

## PERSONAL PROJECTS

### Translation Saving Extension

- Translation of selected text in the browser and displaying it through a tooltip. [Github](#)
- Saving the translated text along with its meaning in the target language to a MongoDB database.
- A mobile application developed with React Native to help memorize words stored in a database.

### Morgana Cli

- A simple CLI (Command Line Interface) application where I added the necessary commands during the development process. [Github](#)

## ACHIEVEMENTS

ITURO 2018

12. MEB Robot Contest

Google FooBar Challenge

## LANGUAGES

Turkish

Native Language

English

Professional Proficiency

## INTERESTS
